

# 2016 International Conference on Advanced Manufacturing

16-19 December 2016, Sun Moon Lake, Nantou, Taiwan

The booming economic development in Asia, particularly the leading manufacturing industries from automobile, machinery, computer, communication, consumer products, flat panel displays to semiconductor and micro/nano areas have attracted intense attention among universities, research institutions and the industry. This conference aims to provide an international forum for researchers, engineers, and professionals worldwide working in the areas of manufacturing to discuss and exchange scientific, technical and management aspects of advanced manufacturing.

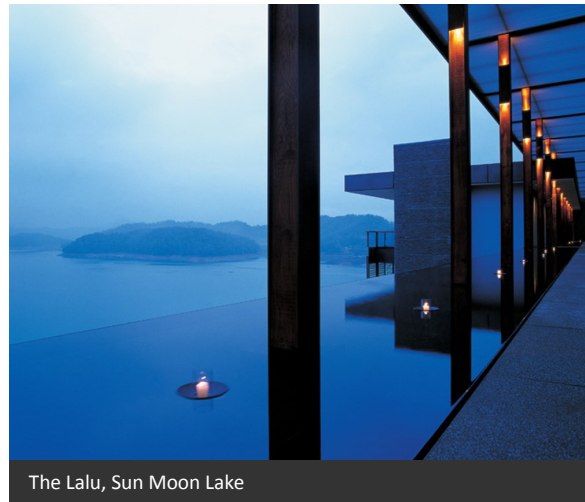

The theme of the conference is "Advanced Manufacturing, Focusing on New and Emerging Technologies". Papers with innovative idea or research results in all aspects of advanced manufacturing are welcomed. This conference is focused on strong interactions among researchers disseminating their quality research.

We are delighted to invite you to submit your paper in ICAM 2016. Excellent papers will be recommended to Journal "Inventions", with the peer review process organized and managed by MDPI.
