## INTRODUCTION

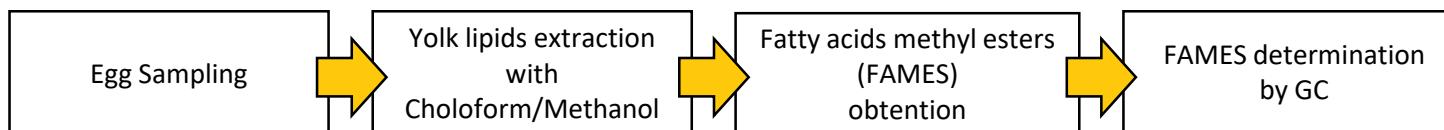

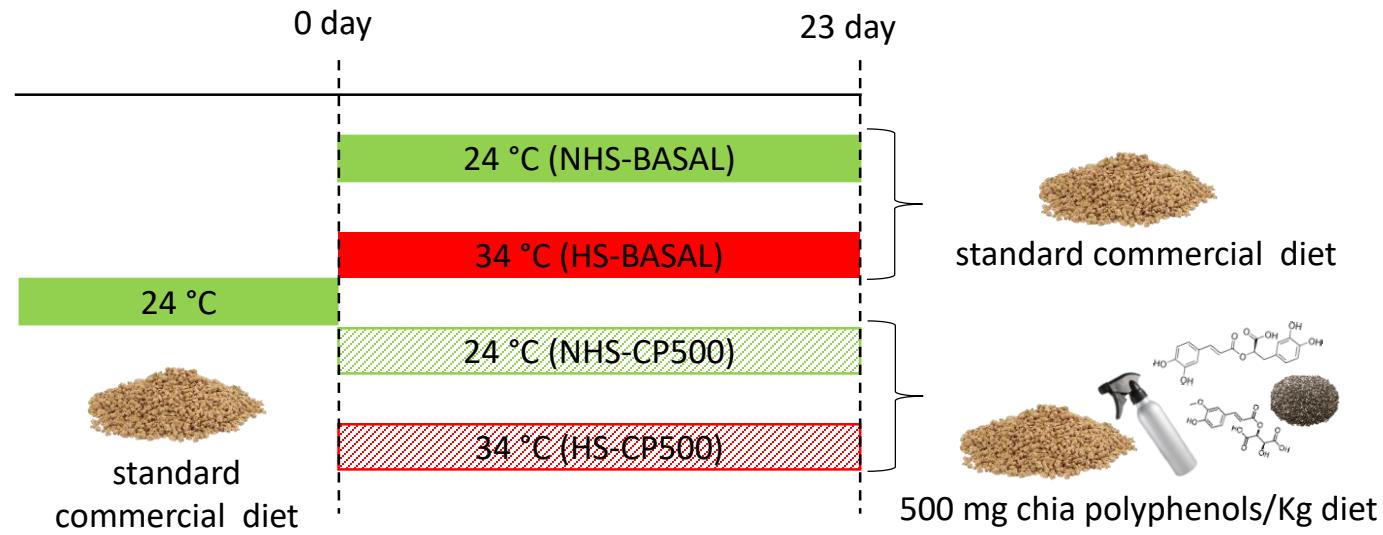

Objective

Study the effects of dietary supplementation with polyphenols from defatted chia seed cake on the fatty acids composition of eggs from Japanese quail exposed to heat stress

## Methods

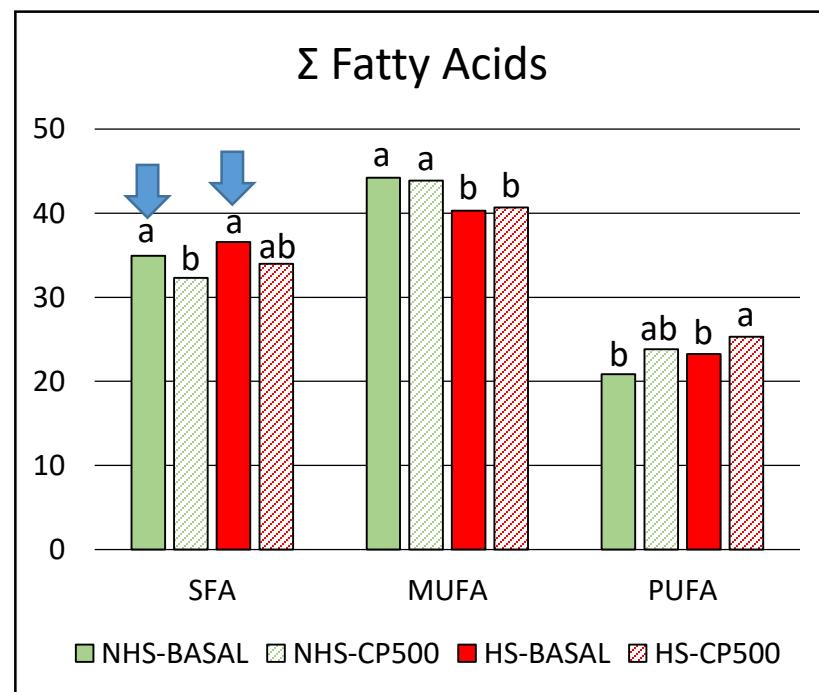

*Coturnix Japonica*  
n = 24 females

SFA: Saturated Fatty Acids  
MUFA: MonoUnsaturated Fatty Acids  
PUFA: PolyUnsaturated Fatty Acids

## Conclusions

The use of defatted chia seed cake seems to be a promising sustainable strategy to improve the nutritional quality of eggs in heat-stress conditions, while decreases the amount of wastes from food industry.
