João Pedro Donadio da Silva Pereira;  
De Sousa, K. T.;  
Sperluk-Belmonte, B.;  
Pinheiro Machado Filho, L. C.

# Introduction

Browning, 2020

# Alternative

Åkerfeldt et al., 2021

# Social behaviors

## SOCIO-NEGATIVES

- Agonistic interactions
- Hierarchy
- Social dominance affects access to water (Coimbra et al., 2012); shade (Deniz et al., 2021), etc.

## SOCIO-POSITIVES

- Cohesive behaviours
- Allogrooming (licking)
- Proximity preferential spatial associations (de Sousa et al., 2021; Reinhardt and Reinhardt, 1981; Machado, 2020; Xu et al., 2020)

# Affinity bonds

**STRESS**

# Enforcement

- Avoid regrouping
- Milking & Transportation
- Calving & Veterinary treatments
- Experiments

# Conclusion

Recognizing the social behavior of animals in housing and management, stimulating normal social development, is respectful to the animal's life, allowing an ethical, ecological, and sustainable livestock.
