† Submitted for presentation at the 5th International Electronic Conference on Atmospheric Sciences, 16–31 July 2022.

**Figure S1.** Assessment of near reference sensors stations. (a) Monitors' geographical location, represented as blue dots either within the 'Area C' Congestions Charge Zone (green area) or the 'Area B' Low Emission Zone (blue area); (b) Collocation of the near reference monitor (within the red rectangle), with the via Senato reference monitor station.
