## 4. Problem of T<sub>E</sub>X edition

### Characteristics of edition via T<sub>E</sub>X

1. high quality in graphics
2. limitation in computing and programming capability
3. generated table tends to be inappropriate
4. page layout can not be set flexibly

## 6. DGS+KETCindy

### From CAS to DGS

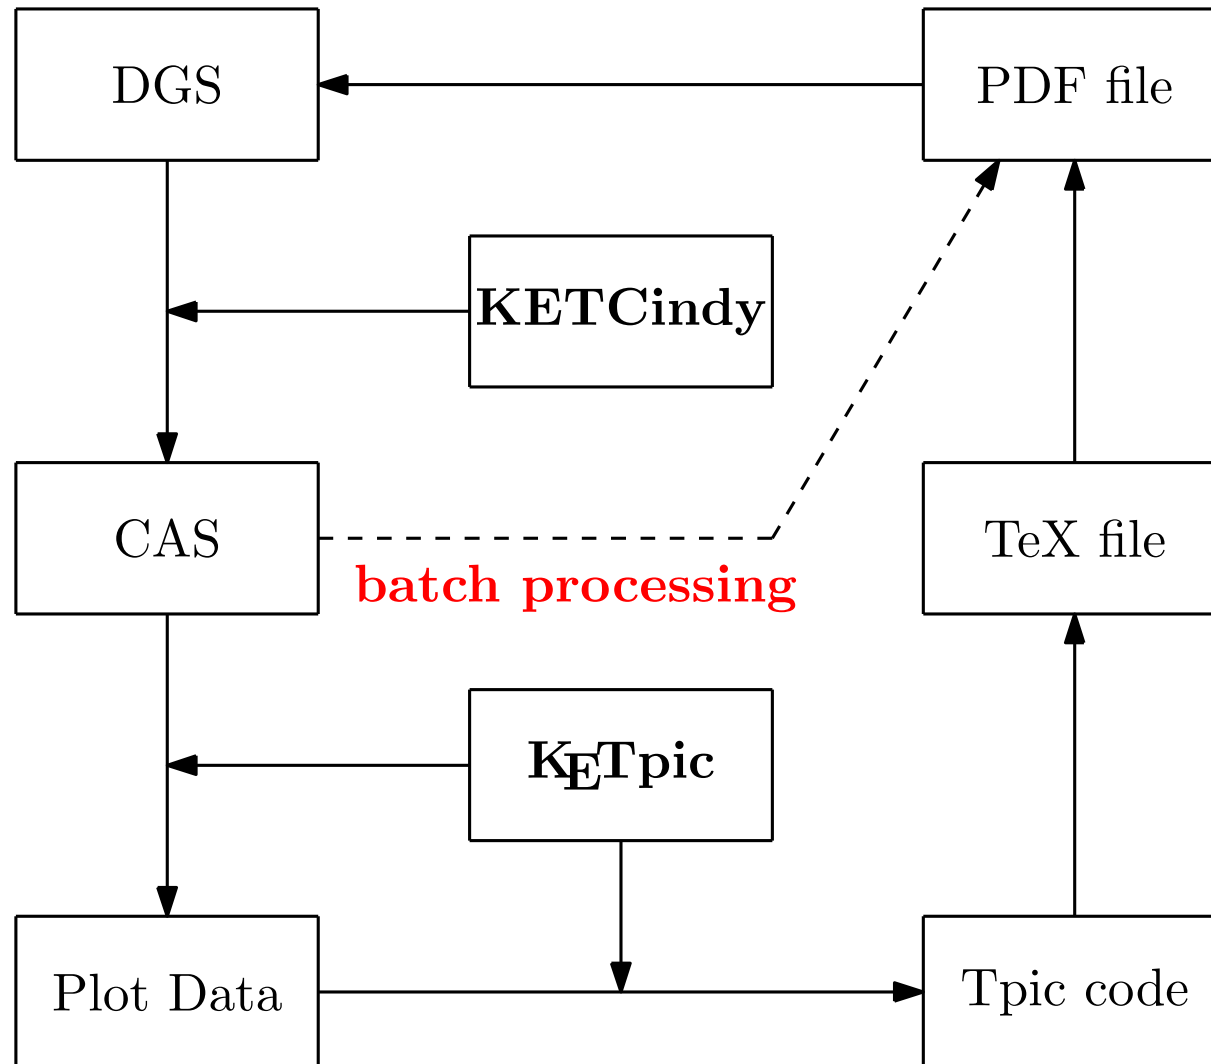

1. DGS may be inferior to CAS in computation and programming capability.
2. Interactive drawing of  $\text{\TeX}$  graphics (while checking the final output) should be helpful.
3. It is desirable that the burden of writing command is reduced.
