

3rd International Electronic Conference on Metabolomics

15-30 November 2018

chaired by Prof. Peter Meikle, Dr. Thusitha W. Rupasinghe, Prof. Susan Sumner, Dr. Katja Dettmer-Wilde

sponsored by

metabolites

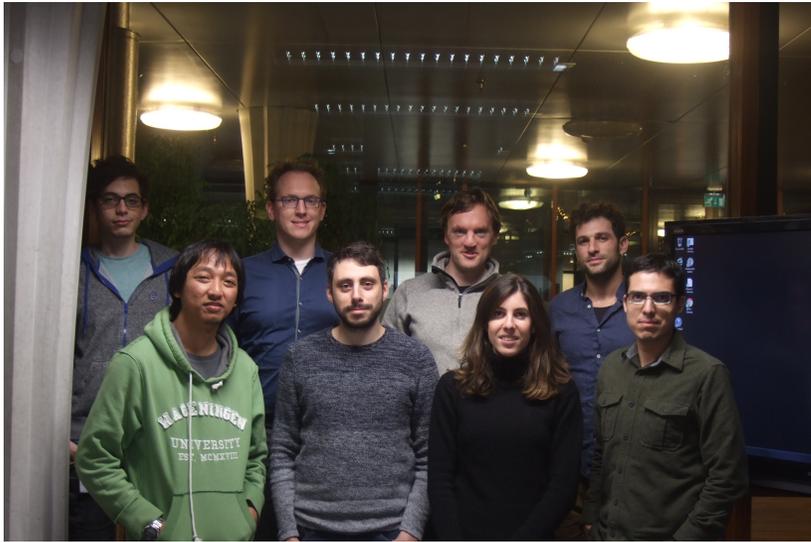

Integrated metabolome mining and annotation workflow accelerates specialised metabolite discovery

Justin J.J. van der Hooft et al.

Bioinformatics Group – Wageningen University, The Netherlands

3rd International Electronic Conference on Metabolomics 15-30 Nov. 2018

Medema lab - Wageningen University, NL

Team work! 😊

Dorrestein lab - San Diego, USA

Glasgow Polyomics - University of Glasgow, UK

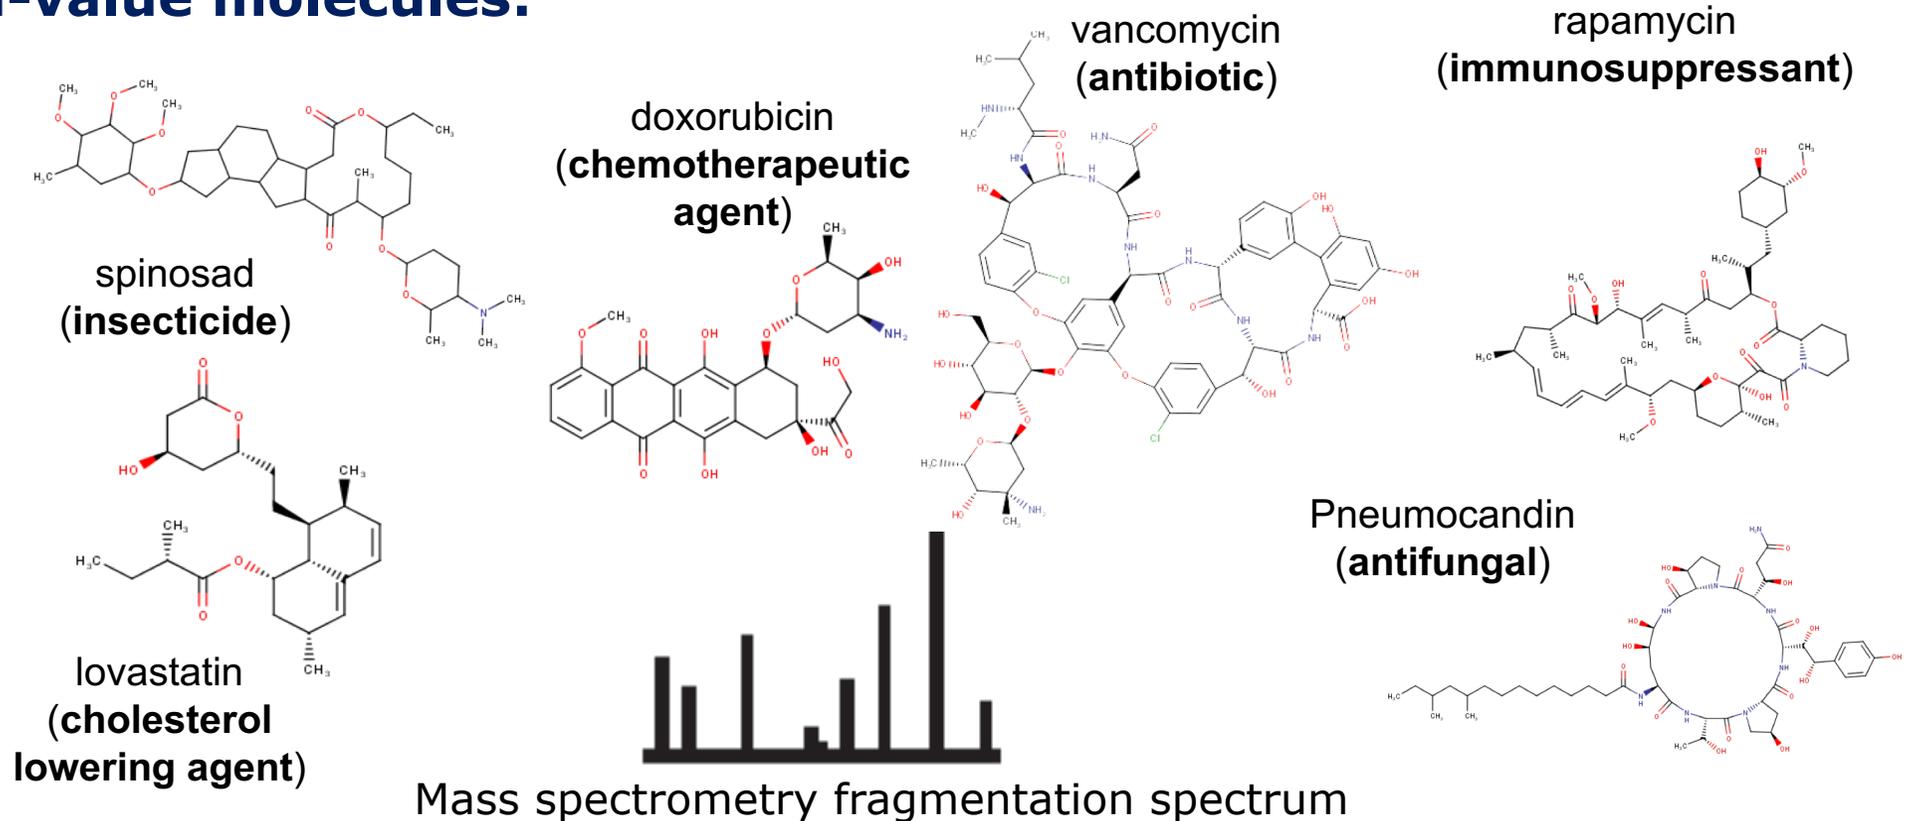

Funding €€ **NWO** eScience center €€

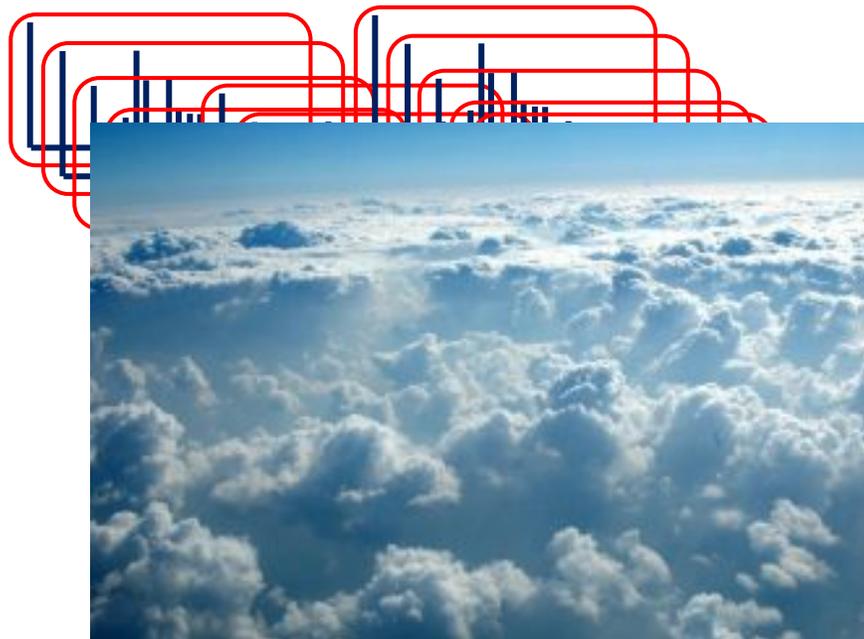

The challenge....

Bacteria, fungi, and plants produce a large & diverse arsenal of high-value molecules:

....is **large-scale coupling of spectral data to molecular structures** of known & especially **novel** natural products molecules

Motivation

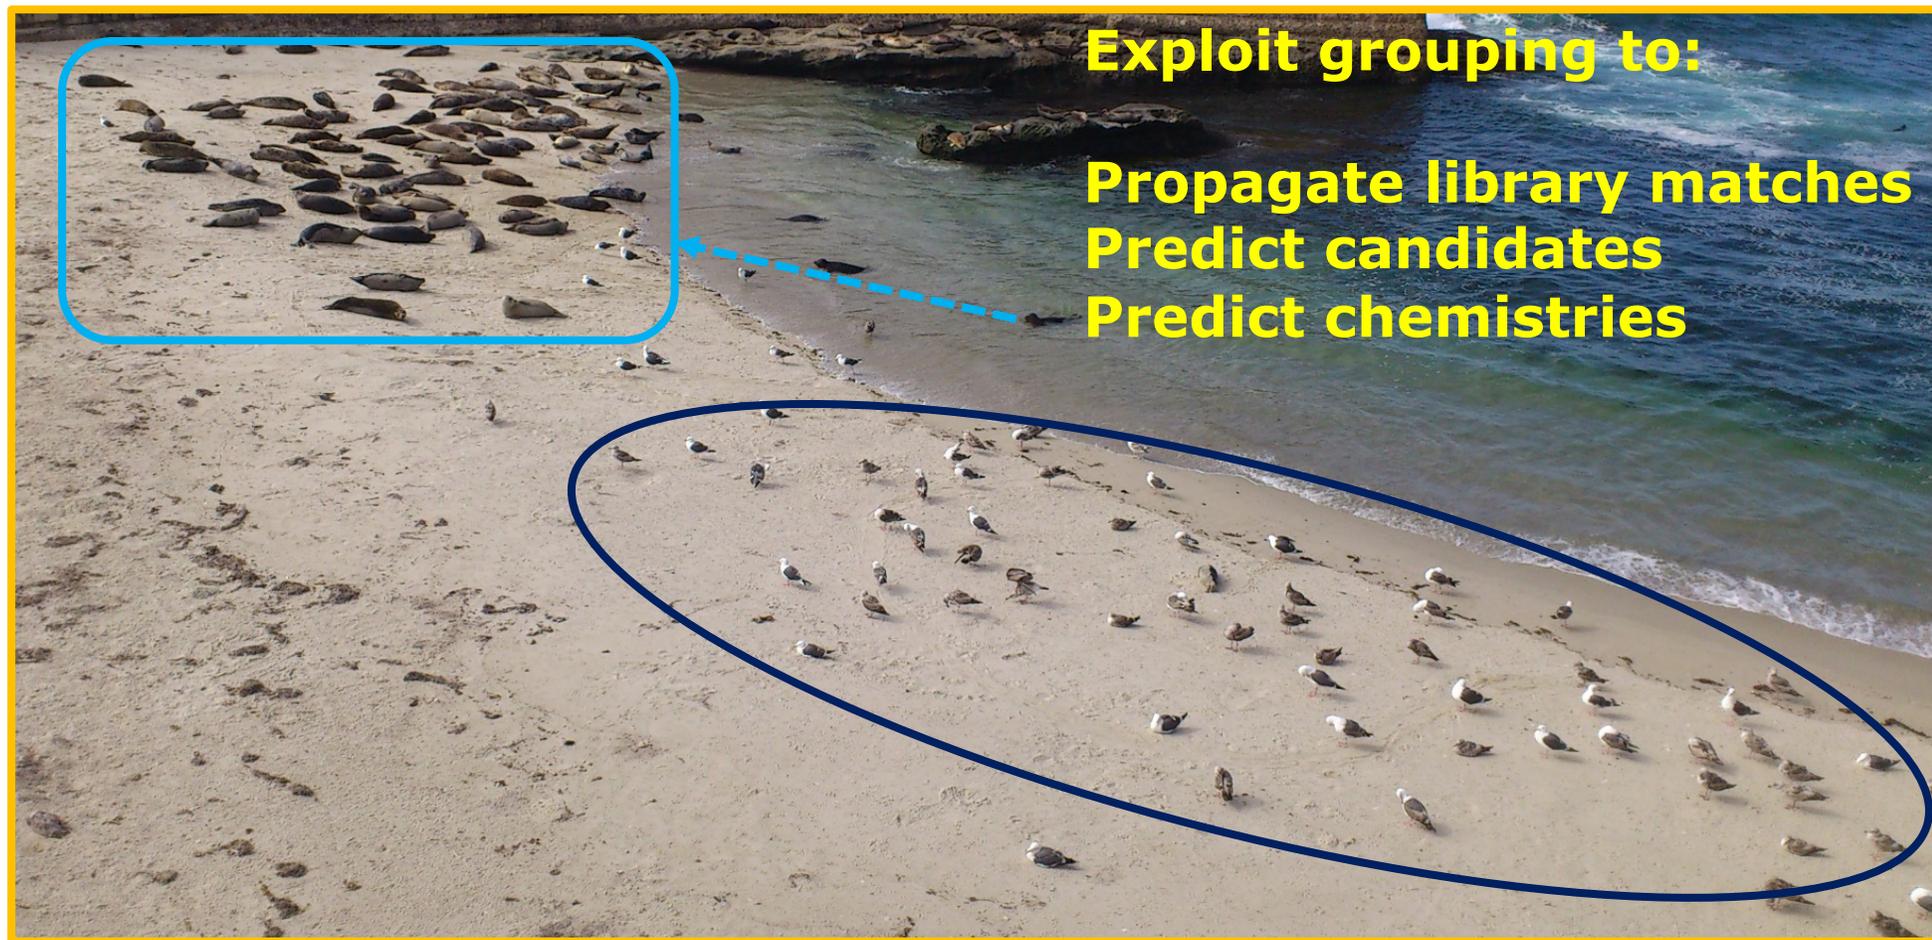

MS/MS information is key to study large sample sets with diverse chemistries

Integrated workflow exploits complementary tools to enhance interpretation

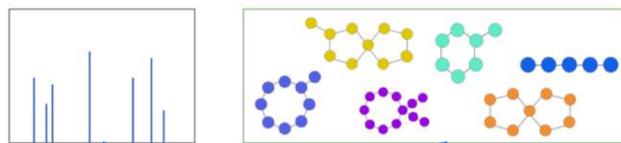

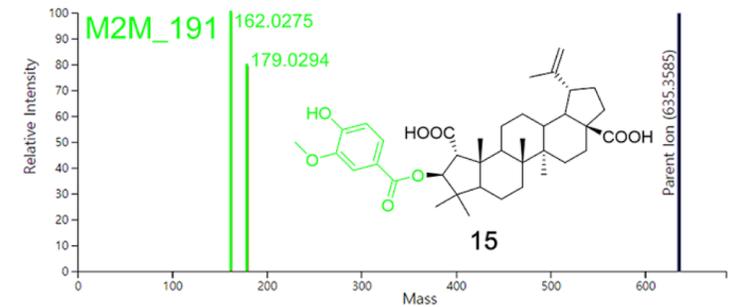

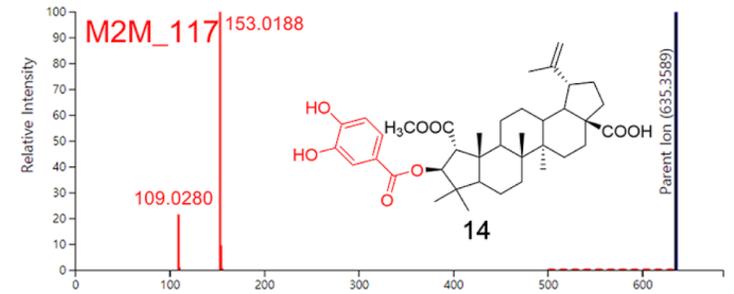

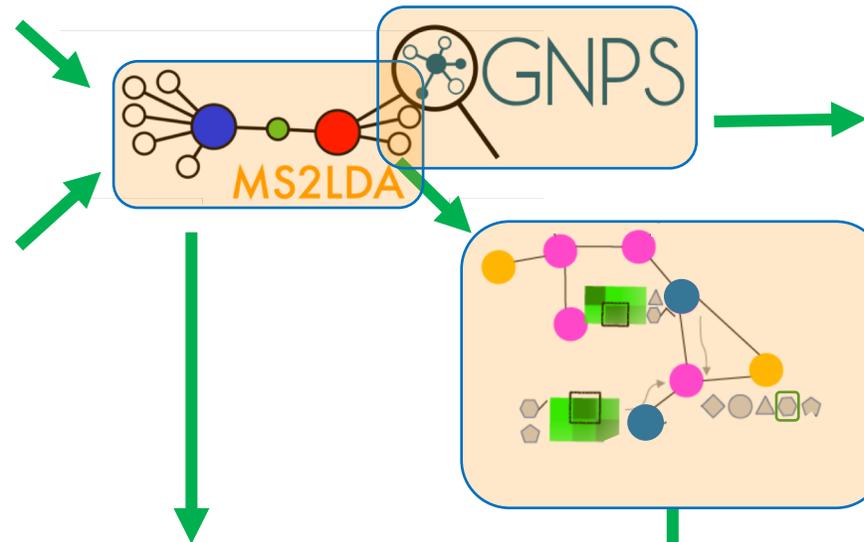

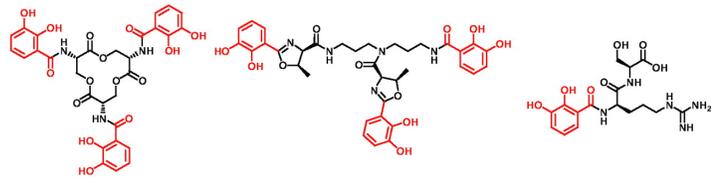

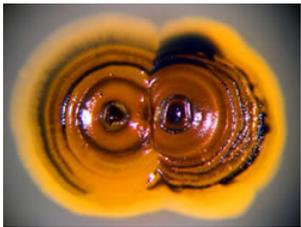

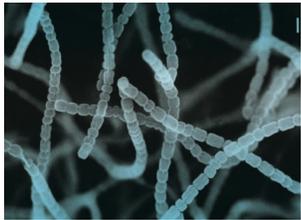

Motivation: Improved annotation power by pattern mining

Molecular Families based on spectral similarity (Molecular Networking in GNPS)

Substructures by extracting “building blocks of metabolomics” (MS2LDA)

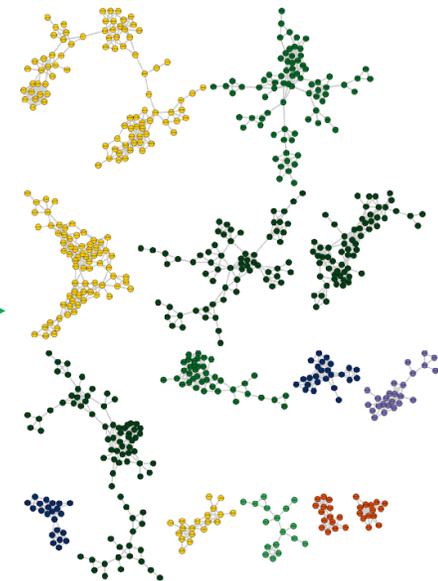

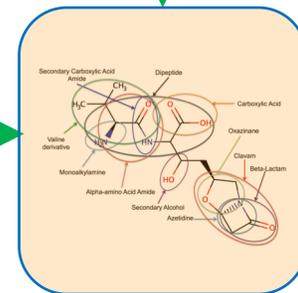

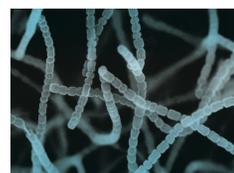

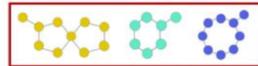

Integrated workflow

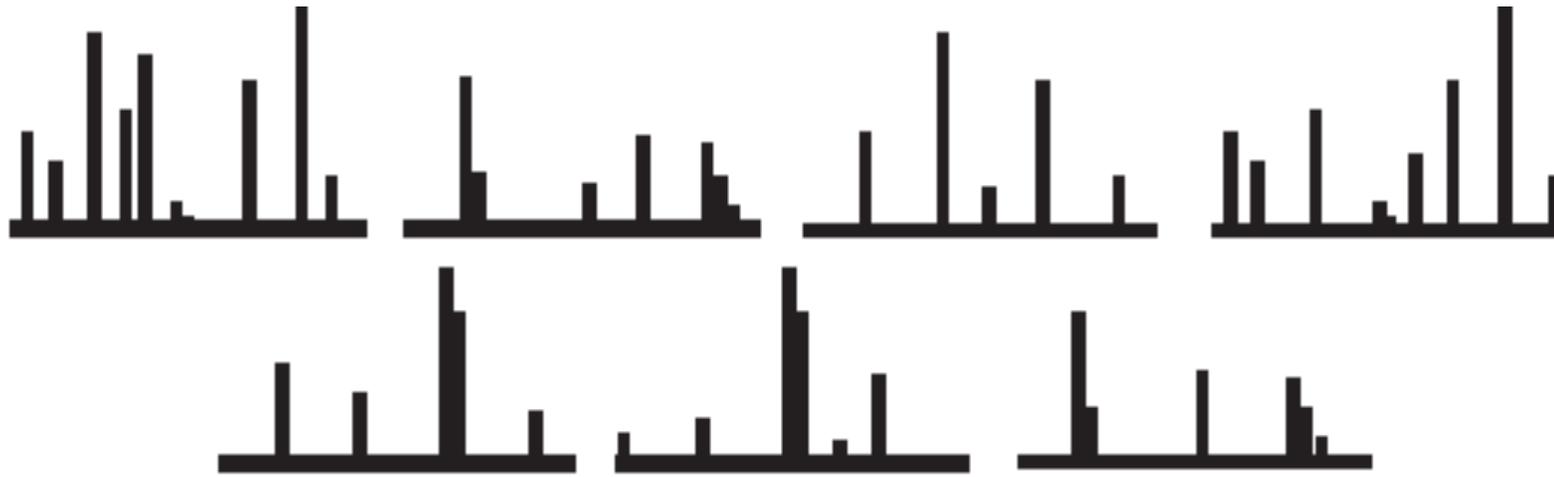

Spectrum

Peptide database

Dr Madeleine Ernst, UCSD

Molecular Networking

Very similar MS/MS spectra are grouped to:

- link spectra across different samples
- reduce redundancy in data set ("consensus spectrum")

Wang, M., et al., "Sharing and community curation of mass spectrometry data with Global Natural Products Social Molecular Networking"

Nat Biotech (2016)

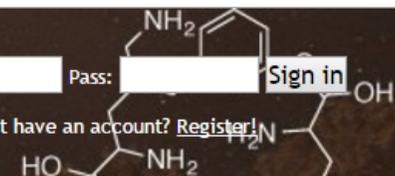

Watrous, JD et al. "Mass spectral molecular networking of living microbial colonies" PNAS (2012)

ClassyFire – SMILES and substituents

INPUT:

```
CC1CC2(C(C1OC(=O)C3=CC=CC=C3)C(C4(C(C=CC5C4C(C2=O)(OC5(C)C)C)OC(=O)C)COC(=O)C)OC(=O)C)O
```

OUTPUT:

ClassyFire

Kingdom: Organic compounds
 Superclass: Lipids and lipid-like molecules
 Class: Prenol lipids
 Subclass: Diterpenoids

...

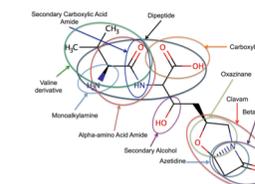

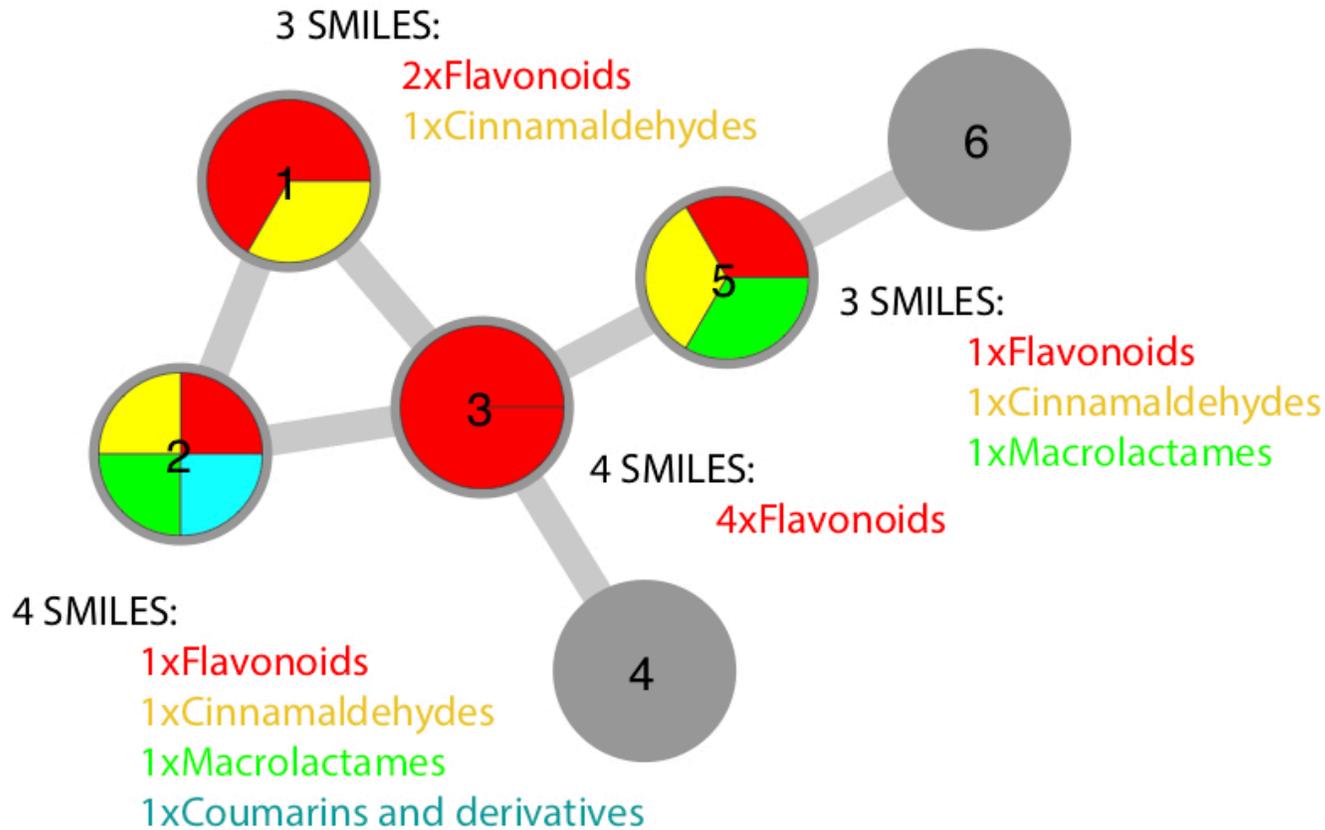

Figure part of Fig. 1 from Djoumbou Feunang et al., J. Cheminform, 2016

ClassyFire – Chemical predictions for MFs

ClassyFire Scoring:

Flavonoids: Database hits:
2.25 nodes/ 4 nodes/
6 nodes = 6 nodes =

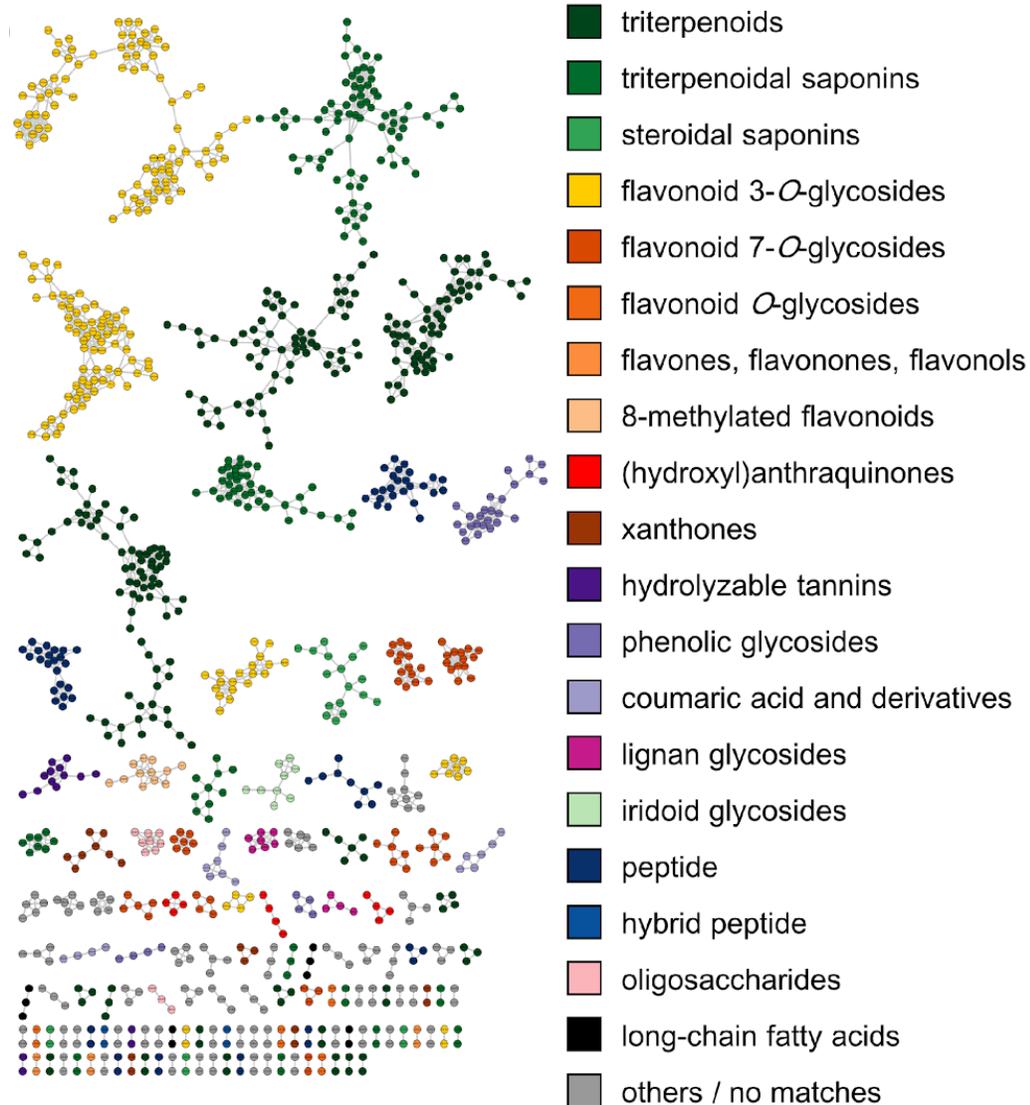

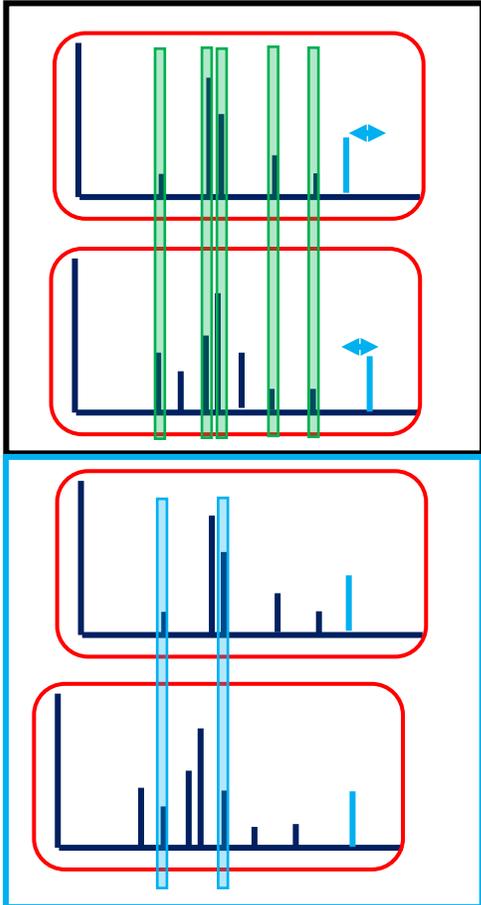

0.375

0.67

Disclaimer: scores dependent on structural database contents!

Illuminating the Rhamnaceae chemistry

DIVERSE

Annotation of bacterial family I

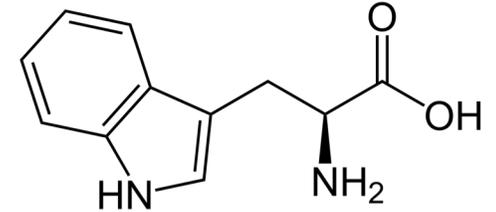

Mass2Motif Annotation

You can assign a label (annotate) this Mass2Motif from the **Annotation** field below. Additionally, a shorter annotation can also be assigned through the **Short Annotation** field. This will be used in the network visualisation.
